

Report of the Chief Fire Warden

OFFICERS AND MEMBERS OF THE CLEARWATER-POTLATCH TIMBER PROTECTIVE ASSOCIATION, INC.

I am pleased to submit the annual report for January 1, 2011 to December 31, 2011. Included is the fiscal year report covering revenues and expenses for the period July 1, 2010 to June 30, 2011.

During 2011, our state of Idaho continued to experience a struggling economy and lower general fund tax revenues. This has resulted in four consecutive years of reductions to our general fund supplemental support to fire preparedness.

This past year, timber harvest levels within the Association remained constant. This activity resulted in our Association Cooperative Work Projects Hazard Reduction program to provide additional fund support. C-PTPA recognizes the significance of this support from our landowners to enhance the strength and capability of our Association.

Our Association has accomplished recent improvements to our radio communications capabilities over the past year. We have updated our Elk Butte Communication Site with the replacement of our primary and secondary repeaters. These aged repeaters, GE Master II, were replaced with new Motorola Quantar repeaters. Also during 2011, a VHF repeater was installed at the Bald Mountain Communication Site. This was an effort to improve firefighter communications on the south end of our protection district.

In May of 2011, the first meeting was held in Roseburg, Oregon for the last five remaining forest protec-

DOUGLAS FOREST PROJECTIVE SSC AAT N

2011 - Roseburg, Oregon

tive associations in the United States. The Clearwater-Potlatch, Southern Idaho, Douglas, Coos Bay and Walker Range Forest Protective Associations benefitted by this opportunity to exchange ideas and discuss similar issues and and procedures pertaining to our fire protection responsibilities.

I would like to express appreciation to C-PTPA employees, cooperating agencies, landowners, and the forest industry for their support during 2011. Their spirit of assistance and cooperation is evident in our success.

FIRE COMMITTEE

Directors serve as Fire Committee

The Clearwater Timber Protective Association and the Potlatch Timber Association were separately organized in the early 1900's. In 1966, these two entities merged to form the Clearwater-Potlatch Timber Protective Association, a non-corporate entity. Subsequently, on July 16, 1982, the Association completed filings for incorporation under the Idaho Nonprofit Corporation Act and became the Clearwater-Potlatch Timber Protective Association, Inc.

The Association is controlled by forest landowners belonging to its membership and subject to the provisions of the Idaho Forestry Act. The Association is primarily responsible for the conservation and protection of the forests and forestland within the State of Idaho; specifically, the Palouse, Potlatch, and North Fork of the Clearwater River drainages.

AUDIT COMMITTEE

Robert McKnight, Chairman Empire Lumber Company, State of Idaho Potlatch Corporation, Tri-Pro Forest Products

LEGISLATIVE COMMITTEE

State of Idaho

Mission Statement

The mission of the C-PTPA is to provide a high level of fire protection for our members' valuable resources.

The hazard management program is designed to reduce the fire hazard created by harvesting timber. Prescribed burning provides a relatively controlled method of reducing potential fire growth and provides a suitable environment for tomorrow's trees to grow.

An educated fire fighter is a safer fire fighter. C-PTPA fire crews are trained annually in the basic skills it takes to safely extinguish fires. The Association participates with other agencies to train loggers and rural fire departments to draw on other cooperators in high fire situations. Our efforts do not stop with today's workforce; we target tomorrow's by teaching kids the dangers and uses of fire.

The C-PTPA maintains an administrative complex in Orofino and three satellite fire camps strategically located in our protection area. In an effort to keep unwanted fire as small as possible, four separate facilities are maintained to reduce arrival time on fires. Quick, efficient initial attack has been and will remain a basic premise of the C-PTPA.

Fire Season 2011

The 2011 fire season for the Clearwater-Potlatch Timber Protective Association was characterized as below normal in severity and in suppression activity. Evenly spread precipitation in the month of June kept fire danger low and yielded only one small lightning caused fire. The cooler, wetter trend continued through the month of July, producing four fires, three of which were human caused. It wasn't until the end of August that our fire season's intensity increased.

On August 29th, an early morning thunder storm moved through the district resulting in 24 fire starts. By keeping to the philosophy of quick initial attack, Association personnel were able to keep fires as small as possible. The biggest fire, Thompson 2, was held to only two acres in tough terrain. The totals for August were 27 fires, 23 caused from lightning, resulting in 10.54 acres burned.

September brought additional warm weather until the middle of the month when temperatures cooled and rain occurred. The season total was 42 fires requiring suppression, a 75 fire departure from our annual average of 117 fires. The Association experienced a high manning class through the majority of the typical 77-day fire season, only reaching the very high class once in September and never reaching the extreme class. Lightning accounted for 29 fires, burning 9.87 acres. Human caused fires totaled 13, burning 11.9 acres.

The Idaho Department of Lands Standard of Protection requires State Districts to meet the following standards:	The Clearwater-Potlatch Timber Protective Association has refined the IDL standards for the fuels and resources of our protective district to:	C-PTPA 2011
 Fires should be contained to less than 10 acres 94% of the time 	 Fires should be contained to less than 10 acres 97% of the time 	100%
IDL should have no more than 34 human caused fires	C-PTPA should have no more than 24 human caused fires	13 Fires 54%
IDL should burn no more than 864 acres	◆ C-PTPA should burn no more than 380 acres	21.77 Acres 6%

This year, C-PTPA had 13 human caused fires for 54% of the allowable standard and burned 21.77 acres for 6% of the allowable standard. The human caused fires included campfires, debris burns, equipment use, children and miscellaneous.

				FOR T	YPICAL 77		IG CLASS SEASON
Month	Low	Moderate	High −3	High +3	Very High	Extreme	Total Days
July	2	3	26	0	0	0	31
August	0	0	3	28	0	0	31
September	0	0	0	14	1	0	15
	2	3	29	42	1	0	77

Retardant Aircraft

During the 2011 fire season, the Association contracted a Bell 206 L-3 Helicopter on 10-minute standby from Hillcrest Aviation. Through a cooperative agreement with the Idaho Department of Lands, two single engine air tankers (SEATS) were available to the Association. The 802F Air Tractor fixed wing aircraft, stationed in Grangeville, Idaho, are capable of delivering 800 gallons of retardant. Due to a moderate fire season, they were not used on any C-PTPA fires.

The C-PTPA helitack program, which consists of three-person modules at predetermined locations, was continued in 2011. The helicopter can transport helitack modules to fires where they can quickly begin suppression activities. Once on the scene, the helicopter can attach a water bucket and begin dropping water from a nearby pond. The aircraft is capable of slinging in a 72 gallon water blivet or other cargo to aid firefighters in inaccessible locations. This program, assisted by the retardant aircraft, has proven to be an efficient, effective means of wildfire suppression.

The helicopter was used for a total of 97.2 hours that included:

- presuppression 71 hours
 fire suppression 26.2 hours

Water drops amounted to 21,876 gallons for a delivered cost per gallon of \$1.92 The helicopter was contracted for 110 hours of guaranteed flight time during the 89 day availability period.

Cooperative Agreement

A cooperative agreement continues to this date between the Association and the State Board of Land Commissioners through the Director of the Idaho Department of Lands. The purpose of this agreement is to clarify the forest protection relationship between the Association and the Idaho Department of Lands. It defines the reimbursable emergency fire suppression expenditures that may be incurred by the State and Association. In addition, the agreement addresses the following: (1) fire protection plans, (2) fire management, (3) reports and records, (4) budgets, (5) administrative matters, (6) payments, (7) duration, and (8) limited obligation by the State.

Dworshak Project - Added Protection

The contract with the Corps of Engineers to provide additional protection services was continued during the 2011 fire season. This agreement provides for boat patrols, aerial patrols, fire prevention, prescribed fire and maintenance efforts in the campsites. An additional contract was negotiated in 1993 with the C-PTPA accepting the responsibility of preparing the fire lines in over 100 campsites along the 53-mile reservoir. This contract was continued for the 2011 season.

In 2011, there were no wildfires that required suppression efforts on Corps of Engineers property. The marine patrol continued prevention and detection efforts in 2011 and early evening aerial patrols were continued on high activity days and holidays.

The draw down of the reservoir has reduced the visitor use of the mini camps, while increasing the number of fires being built outside of fire grills and established campgrounds. The fact that fires are being ignited below the vegetation line encourages visitors to assume there is no danger, so they are more inclined to build fires larger and leave them burning.

Hazard Management

The operating agreement between the State of Idaho and the Clearwater-Potlatch Timber Protective Association for the management of fire hazards resulting from commercial harvest was continued in 2011.

Equipment Replacement and Improvements

During the calendar year 2011, the Association acquired the following:

- 2011 Ford F350 Standard Cab
- 2011 Ford F350 Crew Cab
- 1987 GMC Cab and Chassis

During the calendar year 2011, the Association sold the following:

- 1987 Ford F350
- 1979 Ford F250
